EDUCATION

VIT-AP University <i>B.Tech in Computer Science Engineering (AI & ML)</i> CGPA: 7.0 (Current)	Amaravati, Andhra Pradesh 2024 – 2028
Swaminarayan Gurukul International School <i>Class XII (CBSE)</i>	Hyderabad 2024

TECHNICAL SKILLS

- **Languages:** Python, HTML, CSS, JavaScript, SQL
- **Core Concepts:** Data Structures, DBMS, Object-Oriented Programming (OOP)
- **Domains:** Web Development, Artificial Intelligence, Machine Learning

ACADEMIC PROJECTS

Mobile Feature Comparison Platform (“Mob vs Mob”)

HTML, CSS, JavaScript

- Developed a responsive web application designed to facilitate side-by-side feature comparisons of mobile devices.
- Implemented a clean, user-friendly front-end interface to visualize technical specifications and differencing data.
- Focused on UI/UX design principles to ensure seamless navigation for users researching device specs.

AI-Powered Personalized Learning System

Hackathon Project

- Designed a conceptual framework for an AI-driven education platform that adapts learning content based on student performance.
- Addressed key problem statements in education technology by proposing a system for real-time student assessment and personalized curriculum generation.

Fully Automated Banking System (FABS)

Systems Analysis

- Authored a comprehensive Software Requirements Specification (SRS) document for a full-scale banking automation system.
- Defined functional and non-functional requirements, ensuring a structured approach to software development and system architecture.

CERTIFICATIONS & LEARNING

- **NISM Series V-A:** Preparing for Mutual Fund Distributors Certification Examination (In Progress).
- **Machine Learning:** Completed digital assignments on ML concepts and applications (CSE3008).

ACHIEVEMENTS & INTERESTS

- **Sports:** National Silver Medalist in Taekwondo National Championship.
- **Interests:** Automotive Modification & Tuning, Financial Markets, Gym & Fitness.
